

Curriculum Vitae (Resume)

Personal Information

Name : PRITHIJIT MAJUMDER
Date of Birth : 04th January, 1989
Sex : Male
Nationality : Indian
Email id : prithijit.majumder@gmail.com
Contact No. : +968 9954 1726 & +91-8910 259729
Home town : Kharagpur, West Bengal, India

Educational Qualifications

- **10th Standard** : Kendriya Vidyalaya No. 2, Kharagpur 2005, 65.4%.
- **12th Standard** : Kendriya Vidyalaya No. 1, Salt Lake, Kolkata 2007, 63.7%.
- **B. Arch** : Shri Mata Vaishno Devi University, Katra, Jammu & Kashmir 2012, 62.6%.

Professional Experiences (15 years 10 months from November 2010 to September 2026)

- **Dar Al Handasah**, Muscat Oman : from Feb 2025 to till date, as **Lead BIM Manager** deputed to Client (Ministry of Culture, Sports & Youth, Oman). (1 Year 08 Months)

⇒ **Sayyid Tarik bin Taimur Cultural Complex (STTCC), Muscat, Oman:**

Project Assignment: Client BIM Manager — Ministry of Culture, Sports & Youth (MCSY).

Project Overview:

- A major cultural development comprising of
 - Energy Building & Data Center – Supports Power and Data Infrastructure.
 - Central Plaza & Facility Buildings – Community Space for cultural interactions & Facilities.
 - National Archive – Preserving Oman's documentary heritage.
 - National Library – Research and literary knowledge hub.
 - National Theatre – Premier performance venue.
 - Landscape & Infrastructure – External Public Spaces for Leisure Activities.
- Serving as Client BIM Manager, deputed through Dar Al-Handasah to MCSY, coordinating BIM requirements across the client, Mace PMC/IPMT, design-verification consultant, main contractor JV, specialist subcontractors and supervision consultant.
- Project scope encompasses the transition from design-stage BIM to construction coordination, as-built information delivery and preparation for asset management and future digital operations.

BIM Implementation Scope:

- **BIM Governance and Information Management:** Review the BIM Execution Plan and supporting procedures for alignment with contractual requirements and ISO 19650 information-management principles, including responsibilities, delivery planning, naming conventions, classification and shared parameters.
- **Construction BIM and Coordination:** Oversee the transition from LOD 300 design models, LOD 400 construction and LOD 500 as-built deliverables, with multidisciplinary federation, clash management, model QA/QC and alignment between BIM models, shop drawings and site requirements.
- **Collaborative Delivery and 4D Review:** Monitor BIM coordination and information exchanges through Autodesk Construction Cloud and Aconex workflows; review Synchro-based construction sequencing and associated 4D submissions.

- **As-Built and Asset Information Readiness:** Review requirements for LOD 500 deliverables and Asset Information Models, supporting traceable site verification, structured asset data, FM/O&M readiness and Digital Twin planning.

Job Role & Key Responsibilities:

- Represent the client's BIM interests, assess contractor compliance and provide technical recommendations on model submissions, coordination issues and information-delivery risks.
 - Review BEP revisions, MIDP/TIDP submissions, clash-detection matrices, model QA/QC checklists and asset-information requirements.
 - Oversee phased model reviews covering contractor internal coordination, multidisciplinary federation and final review before formal submission.
 - Review architectural, structural, MEPF and specialist-trade interfaces; track comments, corrective actions and closure evidence using Autodesk Forma Cloud Issue Management Platform.
 - Coordinate BIM meetings and technical reviews, communicating priorities and required actions across consultant, contractor and client teams.
 - Monitor asset-wise BIM progress and escalate delayed submissions, unresolved interfaces and discrepancies between model readiness and site execution.
 - Identify risks to as-built reliability, particularly where underground infrastructure is installed or backfilled before coordinated models and verification records are available.
 - Support asset-information and Digital Twin readiness by reviewing data structures, classification, shared parameters and proposed operational information workflows.
- **Saudi Icon Company, Riyadh, Saudi Arabia :** from March 2024 to December 2024, as **BIM Manager (All Trades & Disciplines)**. (10 months)
- ⇒ **Red Sea Project (Shura Island), Saudi Arabia (On-Site) :** Managing & delivering BIM Models of 200+ Site Buildings with Interior Fit-outs LOD 400 Construction Stage & LOD 500 As-Built Stage along with Clash Detection & Resolution with other Contractors' BIM Models. Coordinating with Client BIM Teams, other Contractors / Vendors and Site Execution Team for resolution of Site Coordination & Design related issues. Review and QA/QC for the BIM Models and resolution of Clashes as per the Clash Detection Reports before submission to Client. Resolving technical queries & issues for the Modelling Teams to deliver on scheduled dates.
- **Jacobs Engineering India Consulting Pvt. Ltd., Udyog Vihar Phase 1, Gurgaon :** from December 2022 to January 2024, as **BIM Manager, GID/CPA**. (1 year 01 month)
- ⇒ **NEOM Oxagon Port City, Saudi Arabia :** Managing & delivering BIM Models of 31 Site Buildings with all ASMEPF Disciplines on LOD 350 along with Clash Detection & Resolution. Managing the BIM Modelling Teams for ASMEPF Disciplines. Review and QA/QC for the BIM Models and creation of Clash Detection Reports before submission. Resolving technical queries & issues for the Modelling Teams to deliver on scheduled dates.
- **Egis India Consulting Engineers Pvt. Ltd., Sector – 32, Gurgaon :** from November 2019 to December 2022, as **BIM Manager, EDC (Egis Design Center)**. (3 year 02 months)
- ⇒ **Dhaka Metro Line - 5 North & South, Bangladesh :** Designing of Concept Design option presentations in BIM Platforms to showcase Budget comparison scenarios to the Client. Use of

Generative Design and AI is being implemented using Revit Dynamo. Creation of Elevated and Underground Station Designs from Concept (LOD 100) to Detailed Design (LOD 300) Stage.

- ⇒ **Bengaluru Metro Airport Terminal Station, Bengaluru, India** : Working with the Design Team to create BIM Model of Airport Terminal Shallow Underground Station in LOD 350 (GFC).
- ⇒ **Pune Airport (PNQ) New Terminal Building, India** : Directed the Gurgaon EDC BIM team to deliver LOD 400 construction models and LOD 500 as-built operational models for the new integrated terminal.
- ⇒ **Lucknow Airport (LKO) Terminal 3, India** : Led comprehensive BIM modeling (LOD 400/500) for structural and MEP disciplines, ensuring seamless clash resolution to accommodate advanced baggage handling systems within the updated master plan footprint.
- ⇒ **Trichy International Airport (TRZ) Integrated Terminal, India** : Managed the transition of terminal design geometry into fabrication-ready LOD 400 models and operational LOD 500 digital assets.
- ⇒ **Dassault Reliance Aerospace Ltd. (Phase 1.2), Nagpur, India** : BIM Modelling of 2 Hangar Facilities, 3 Ancillary and Parking Area in LOD 450 with an intent of Facility Management.
- ⇒ **Delhi Metro Rail Corporation Phase 4** : Managing the production and delivery of the BIM Models for the Stations:
 - **Rithala – Bawana – Narela, Delhi** – Elevated Line Length – 21.73, No. of Stations – 20.
 - **Janakpuri – Majlis Park** – Elevated Line Length – 18.04, No. of Stations – 10.
 - **Majlis Park – Maujpur** – Elevated Line Length – 12.54, No. of Stations – 10.
 - **Total Length:** 52.31 Km
 - **Total Stations:** 40
 - **Station Details:** Elevated Stations are having concourse and platform level
 - **Major Activities Performed:** Managing and coordinating the project work between all the teams from different discipline.
- **Intec Infra-Technologies Pvt. Ltd.**, Sector – 61, Gurgaon : from February 2018 to November 2019, as **Project Manager, Architecture**. (1 year 09 months) :
 - ⇒ **Consultant BIM Manager** for Riyadh Metro - deputed to **AECOM Kolkata** (06 months)
Riyadh Metro Line 1 & 2 (BACS Consortium) : Elevated Stations, Park & Ride (For the parking of Metro) and Metro Station Emergency Egress / Exit, Riyadh, Saudi Arabia. [Worked as BIM Manager overseeing Project Delivery and managing resources allocation with respect to the project timeline along with supporting team members to resolve queries and project related issues in a team of 30+ Members.]
 - ⇒ **Project Manager, Architecture** for BIM Outsourcing Projects of US, UK, Middle-East, Australia and South-East Asia. (1 year 03 months)
- **Autodesk Consulting**, Bangkok, Thailand, Singapore & India : from October 2015 to December 2017, deputed from **UniBIM Services Pvt. Ltd.** as :
 - ⇒ **Technical Consultant** for BIM Implementation in **Ananda Development** deputed from **UniBIM Services**. (Bangkok, Thailand) (1 year 03 months)

Premium High-Rises at Bangkok, Thailand: Worked as an AEC Technical Consultant (deputed from UniBIM Services via Autodesk Consulting) to spearhead enterprise-level BIM implementation for two flagship luxury residential towers. Managed and imparted BIM expertise to a decentralized, global workforce of 326 team members across Bangkok, India, Singapore, Vietnam, South Korea, Japan, Australia and the US.

Project Overview:

- **Ashton Asoke:** A 50-story ultra-luxury residential tower (783 units) located at the prime Asoke intersection, featuring a complex, iconic curved-glass architectural facade.
- **Ideo Mobi Sukhumvit 66:** A 28-story premium high-rise (298 units) focused on smart living, maximizing spatial efficiency and modern residential amenities.
- **The Design Consortium:** Coordinated strictly with industry-leading consultants including A49 (Architectural), DWP (Interior Design), Qbic (Structural Engineering) and EEC (MEPF Engineering).

BIM Implementation Scope:

- **Strategic BIM Execution:** Developed and enforced a unified BIM Execution Plan (BEP) tailored for high-density luxury residential projects, driving the transition from LOD 200 schematic design through to LOD 400 construction-ready geometry.
- **Complex Interdisciplinary Coordination:** Led rigorous 3D spatial coordination and Navisworks-based clash detection between A49's intricate architectural envelopes, Qbic's high-rise structural frameworks, EEC's dense MEPF routing and DWP's highly detailed interior fit-outs.
- **Cloud-Based Standardization:** Implemented standardized Common Data Environment (CDE) protocols to ensure seamless data exchange and version control across the 8-country international design and modeling team.

Job Role & Key Responsibilities:

- **Global Resource Management:** Directed the massive 326-member international modeling team, allocating resources dynamically to meet aggressive project milestones and resolving cross-time-zone communication bottlenecks.
- **Quality Assurance & Auditing:** Conducted stringent QA/QC audits on all incoming multi-disciplinary models, ensuring parameter compliance, geometric accuracy and data integrity before final client submissions.
- **Technical Consulting & Training:** Acted as the primary Autodesk subject matter expert, providing hands-on troubleshooting, workflow optimization and upskilling sessions to both internal teams and the external design consultants.

⇒ **Technical Consultant** for BIM Implementation in **Dung Quất Refinery** deputed from **UniBIM Services**. (Quảng Ngãi, near Da Nang, Vietnam) (06 months)

Dung Quất Refinery (Petrovietnam), Quảng Ngãi, Vietnam: Worked as an AEC Technical Consultant (deputed from UniBIM Services via Autodesk Consulting) to drive enterprise-level BIM implementation for Vietnam's first oil refinery facility.

Project Overview:

- **Facility Scale:** A massive heavy industrial and petrochemical facility with a processing capacity of 6.5 million tons per year.
- **Infrastructure Complexity:** The project scope encompassed intelligent 3D modeling for highly complex process utility facilities, massive crude tank farms and extensive interconnecting pipeline networks.

BIM Implementation Scope:

- **Strategic BIM Execution:** Developed and executed a comprehensive BIM Execution Plan (BEP) tailored specifically for the rigorous demands of heavy industrial infrastructure.
- **Workflow Transformation:** Managed the strategic transition of engineering teams from legacy 2D drafting workflows to advanced, data-rich BIM platforms.
- **Industrial LOD Standards:** Established and enforced strict LOD 350,400 & 500 modeling standards customized for intricate piping, heavy structural steel and complex mechanical equipment.

Job Role & Key Responsibilities:

- **Complex Interdisciplinary Coordination:** Led multi-disciplinary coordination and Navisworks-based clash detection across highly dense mechanical nodes to ensure strict constructability and geometric accuracy before fabrication.
- **Technical Consulting & Training:** Acted as the primary subject matter expert, conducting customized training and providing hands-on technical troubleshooting for the engineering teams.
- **Digital Handover & FM Integration:** Optimized the asset information management process, ensuring the final models contained accurate data for long-term facility operations, lifecycle maintenance and future expansion planning.

⇒ **Technical Consultant** for BIM Implementation in Singapore Metro – **Land Transport Authority**

deputed from **UniBIM Services**. (Singapore) (1 year)

Singapore Metro Line Extension Project (Land Transport Authority), Singapore: Worked as a Technical Consultant (deputed from UniBIM Services) to lead enterprise-level BIM implementation for a major mass rapid transit extension, managing a multi-disciplinary team of over 200 members.

Project Overview:

- **Infrastructure Scale:** A large-scale rail extension project comprising multiple complex underground and shallow underground stations, complete with all associated transit facilities.
- **Project Lifecycle:** Encompassed comprehensive BIM integration spanning from the Detailed Design phase through to active Construction.

BIM Implementation Scope:

- **Strategic BIM Execution:** Developed and deployed a robust BIM Execution Plan (BEP) tailored for complex subterranean rail infrastructure and strictly aligned with the Land Transport Authority's (LTA) stringent digital delivery standards.
- **Underground Spatial Coordination:** Established specialized workflows for intricate spatial coordination, integrating massive structural station boxes, heavy civil tunneling works and dense MEP network routing within highly constrained underground environments.
- **Lifecycle Data Integration:** Ensured the 3D models were data-rich and structured to support 4D construction sequencing and long-term facility management.

Job Role & Key Responsibilities:

- **Large-Scale Team Management:** Directed, mentored and allocated resources for a 200+ member international modeling and engineering team, ensuring consistent and timely delivery across all project milestones.
- **Technical Consulting & Troubleshooting:** Acted as the primary BIM subject matter expert, resolving complex software bottlenecks, optimizing large-file model performance and conducting targeted upskilling sessions for the design teams.
- **Stringent QA/QC Auditing:** Performed rigorous quality control on all multi-disciplinary models to guarantee clash-free geometry and parameter compliance before final submission to the LTA.

⇒ **Project Manager** for **Scan to BIM of Heritage Forts** in Rajasthan, India (1 year 06 months):

Heritage Forts & Palaces (Scan to BIM), Rajasthan, India: Worked as a Project Manager for an 18-month initiative to lead a massive digital preservation project, transforming LiDAR point cloud data into highly detailed as-built models for India's iconic monuments.

Project Overview:

- **Heritage Scale:** Encompassed the digital documentation of several historically significant structures, including Amer Fort (Jaipur), City Palace, Albert Hall, Udaipur Fort and Kumbhalgarh Fort.
- **Project Objective:** Developing high-fidelity, LOD 500 (As-built) digital representations to support historical conservation, precise structural analysis and future facility management.

BIM Implementation Scope:

- **Advanced Scan-to-BIM Workflows:** Managed the complex processing, registration and translation of massive terrestrial laser scan (LiDAR) datasets and point clouds into precise 3D architectural geometry.
- **Intricate Heritage Detailing:** Ensured the LOD 500 models accurately captured the highly complex, non-linear geometries typical of ancient architecture, including ornate carvings, structural deformations and historical masonry.
- **Data Optimization:** Established protocols for handling and optimizing exceptionally heavy file sizes without compromising the millimeter-level accuracy required for heritage conservation.

Job Role & Key Responsibilities:

- **Large-Scale Team Leadership:** Directed and mentored a specialized workforce of 80 professionals (65 BIM Modelers and 15 Architects), coordinating their efforts to manage dense datasets and deliver complex models.
- **Rigorous QA/QC Auditing:** Implemented strict quality assurance protocols to visually and dimensionally verify that the generated Revit models perfectly aligned with the raw point cloud data.
- **Resource & Timeline Management:** Oversaw overall project scheduling, resource allocation and workflow optimization to ensure the timely delivery of these data-heavy assets.

➤ **WS Atkins, Gurgaon & Bengaluru :** from February 2015 to October 2015, **BIM Architect (working as BIM Manager)** for Implementation of BIM in their existing Design process. (09 months Contractual Basis)

⇒ **Riyadh Metro Line 4 & 6 (Atkins + Typsa), Riyadh, KSA :** Elevated, Shallow Underground Stations and Park & Ride.

- **Project Overview:** A comprehensive mass transit infrastructure project comprising complex elevated stations, shallow underground stations and expansive Park & Ride facilities.
- **BIM Scope:** Integrated advanced spatial coordination and modeling standards into traditional design workflows to support multi-disciplinary transit engineering.
- **Job Role & Key Responsibilities:** Directed digital design delivery and managed inter-disciplinary spatial coordination across architectural, structural and MEP domains to ensure stringent compliance with transit authority standards.

➤ **Intec Infra-Technologies Pvt. Ltd., Sector – 44, Gurgaon :** from November 2013 to January 2015, as **Team Lead BIM, Architecture.** (1 year 03 months)

⇒ **Grand Theatre de Rabat (Zaha Hadid Architects), Morocco :** Directed comprehensive Design and Construction stage BIM coordination for a world-class cultural venue featuring highly complex, non-linear parametric architectural geometries.

⇒ **King Abdullah International Gardens (KAIG), Riyadh, KSA :** Managed design-stage BIM modeling and coordination for a massive series of climate-controlled botanical gardens and intricate landscaping infrastructure.

⇒ **King Fahad Medical City (KFMC), Riyadh, KSA :** Led design-stage inter-disciplinary BIM coordination for the Central Service Building of one of the largest healthcare complexes in the Middle East.

⇒ **Doha International Airport (Buro Happold), Doha, Qatar :** Led design-stage BIM coordination and technical modeling teams for the development of the complex new aviation terminal building.

- ⇒ **National Bank of Kuwait (NBK) Headquarters, Kuwait** : Coordinated design-stage BIM activities for a highly complex, iconic high-rise commercial banking headquarters.
- ⇒ **Sainsbury's Nine Elms Redevelopment, London, UK** : Managed end-to-end BIM modeling and coordination spanning both Design and Construction stages for a major urban regeneration project featuring retail and luxury residential spaces.
- ⇒ **A30 Temple to Higher Carblake Improvement, Cornwall, UK (KIER)** : Managed design-stage BIM modeling and inter-disciplinary coordination for a major highway dual carriageway infrastructure project connecting Cornwall to the broader UK network.
- ⇒ **Ireo Grand Arch (Ireo Developers), Gurgaon, India:** Directed design-stage BIM modeling and architectural coordination for a premier, large-scale luxury residential complex.
- **Office of Sanjay and Sridevi Adhlakha (OSSA Architects), Dollar's Colony, Bangalore:** from November, 2012 to October, 2013, as **Jr. Architect**. (1 year)
- ⇒ **Omicron Office and Workshop, Bengaluru, India:** Scope & Responsibilities: Executed end-to-end architectural design, detailing and comprehensive BIM modeling for an overall turnkey commercial project. Managed inter-disciplinary BIM coordination, led the technical modeling team and drove both Design and Construction stage BIM activities for external architecture and interior fit-outs, facilitating weekly progress meetings directly with the client.
- **Studio for Architecture Landscape Interior Enterprise Pvt. Ltd. (SALIENT Pvt Ltd), Salt Lake, Kolkata** : from November, 2010 to October, 2012, as **Jr. Architect**. (2 years)
- ⇒ **City Center (Siliguri, Patna & Raipur), India:** Led overall architectural design, high-level detailing and BIM management for multiple major commercial retail centers. Directed inter-disciplinary BIM coordination and managed the technical design team through rigorous weekly client engagements.
- ⇒ **Benubana Chhaya Park, Kolkata, India:** Provided specialized BIM support for complex landscape architecture. Managed overall design integration, inter-disciplinary coordination and team leadership to deliver cohesive site modeling.

NOTE: Other BIM Project Names cannot be disclosed due to Confidentiality Agreement with the respective companies.

Computer Skills

- ✓ **BIM Implementation** : 10/10
- ✓ **Autodesk Revit** : 9/10
- ✓ **Autodesk Navisworks** : 9/10
- ✓ **Autodesk Forma** : 10/10
- ✓ **Autodesk ReCAP** : 7/10
- ✓ **Autodesk 3ds Max** : 5/10
- ✓ **Autodesk Civil 3D** : 5/10
- ✓ **Enscape** : 7/10
- ✓ **Primavera** : 6/10
- ✓ **Power BI** : 6/10
